Charging Tray for 2 Cordless Table Lamps

Product Code:	101.937
Dimensions:	**Length:** 260mm x **Width:** 130mm
Input:	5v Power Adapter

Charging Guide

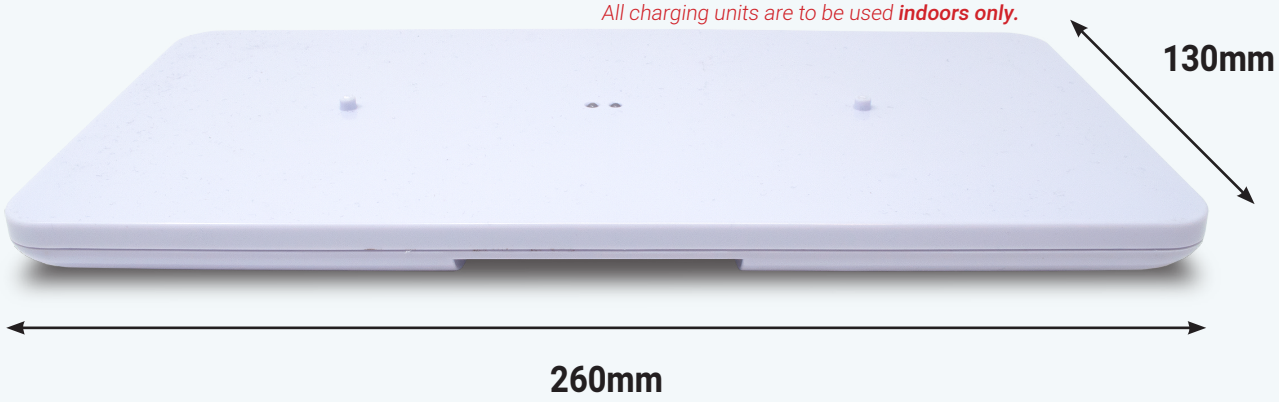

*The lamps must be **turned off** before placing it on the charging tray.*

1: There are raised pins on the tray that are there to secure the lamp in place while it is charging. Place the hole in the base of the lamp over the raised pin for a secure charge.

2: Red light indicators are situated in the middle of the tray to indicate if the charging tray is turned on. The lamp will glow red while charging and will turn green when the it is fully charged.

3: The charging tray features two input jacks underneath the tray. Connect the supplied 5v power adapter to either jack to provide power to the tray.

*All charging units are to be used **indoors only.***

Charging Tray for 4 Cordless Table Lamps

Product Code:	101.936
Dimensions:	**Length:** 210mm x **Width:** 225mm
Input:	5v Power Adapter

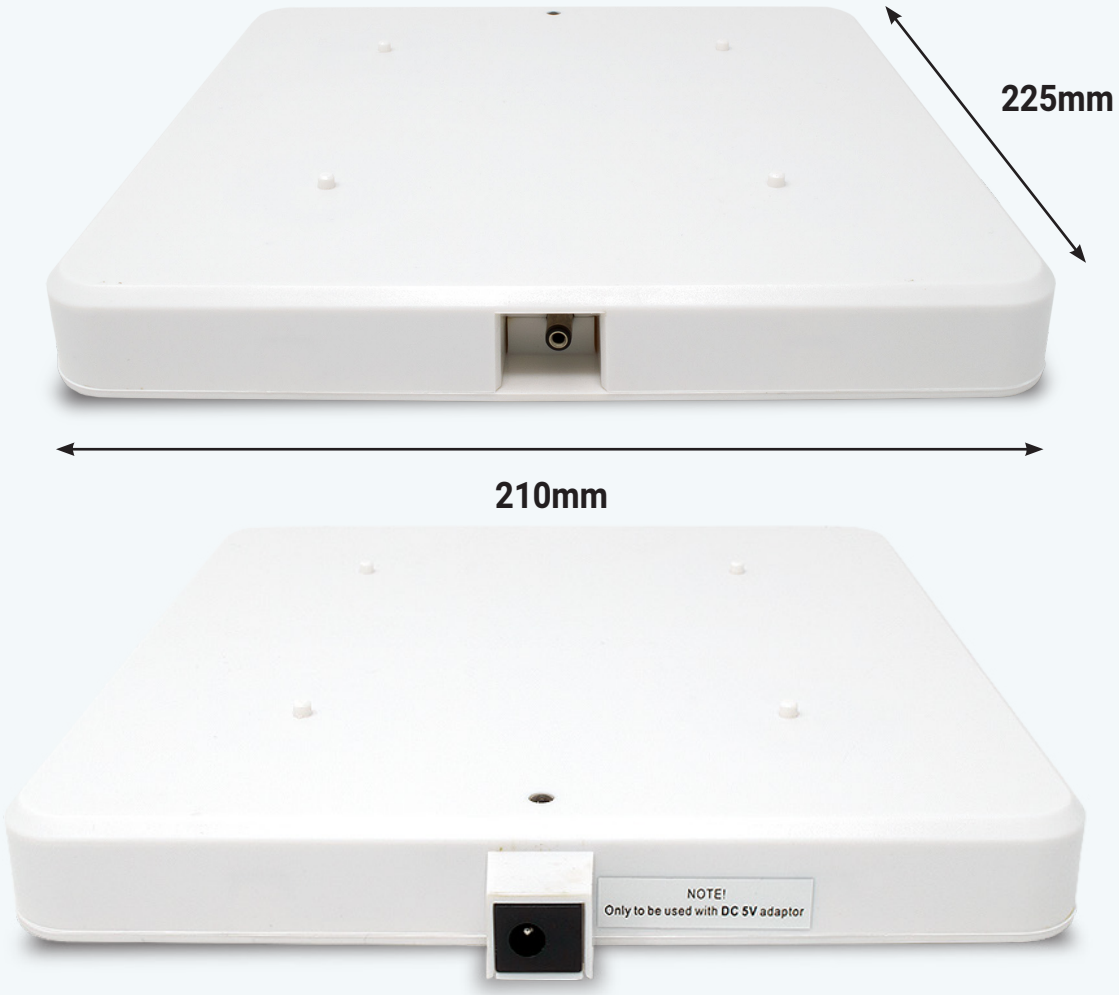

Charging Guide

*The lamps must be **turned off** before placing it on the charging tray.*

1: There are raised pins on the tray that are there to secure the lamp in place while it is charging. Place the hole in the base of the lamp over the raised pin for a secure charge.
2: A red light indicator is situated near the input jack of the tray to indicate if the charging tray is turned on. The lamps will glow red while charging and will turn green when the it is fully charged. The indicator light will remain red
3: The charging tray features two 5v power adapter jacks at either end of the tray. Connect the supplied 5v power adapter to the input jack situated on the extended section to provide power to the tray.
4: The charging tray can be linked with a second charging tray to provide a total of 8 charging pegs. Connect the two trays together by inserting the extended female jack in to the male jack on the opposite side of the tray. We highly reccommend **not exceeding** two trays being connected at the same time.

*All charging units are to be used **indoors only.***

Product Code:	101.934
Dimensions:	**L:** 700mm x **W:** 445mm x **H:** 770mm
Weight:	6KG
Input:	Meanwell 5V LED Driver
Driver Product Code:	RSP200-5

FOR PROFESSIONAL USE ONLY

This charging station is only available for commercial use only.

Charging Guide

*The lamps must be **turned off** before placing it on the charging tray.*

1: There are raised pins on the tray that are there to secure the lamp in place while it is charging. Place the hole in the base of the lamp over the raised pin for a secure charge.

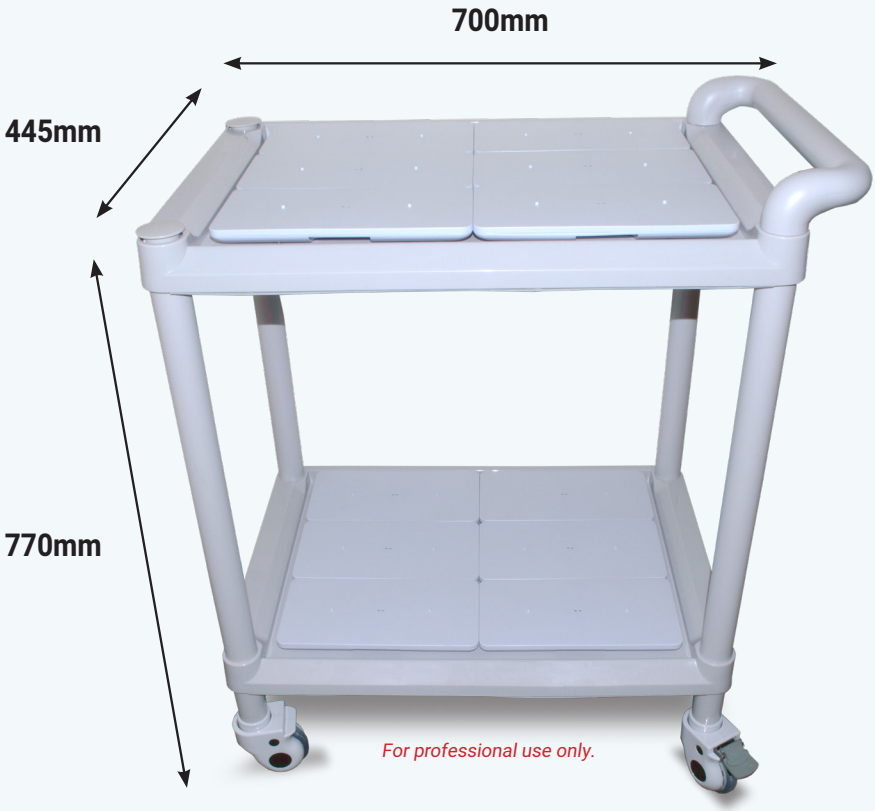

2: Red light indicators are situated in the middle of each tray to indicate if the charging tray is turned on. The lamps will glow red while charging and will turn green when the it is fully charged. The indicator light will remain red.

3: The charging trolley is powered through an I.E.C connection (Kettle Mains Lead). The input is situation at the back of the bottom shelf. The charging trays are fixated to the shelves.

4: The trolley features lockable wheels to secure it in place and prevent damage to the lamps while charging. A latch is situated above the back wheels, when pressed down, the wheels lock.

5: A 5V Meanwell LED Driver is situated at the bottom of the trolley. The driver is exposed, meaning this unit is to be used indoors only to prevent any water splashing the unit. This product is to be used by professionals only within the commercial sector.

Please Note: The charging trays & trolley options are not included with your purchase of the lamp. Each charging unit is sold separately. A charging method is required to operate the lamp.

**Charging methods may vary depending on charging station.*
