LEDTech Long Arm Exhibition Light Top Slot Fitting

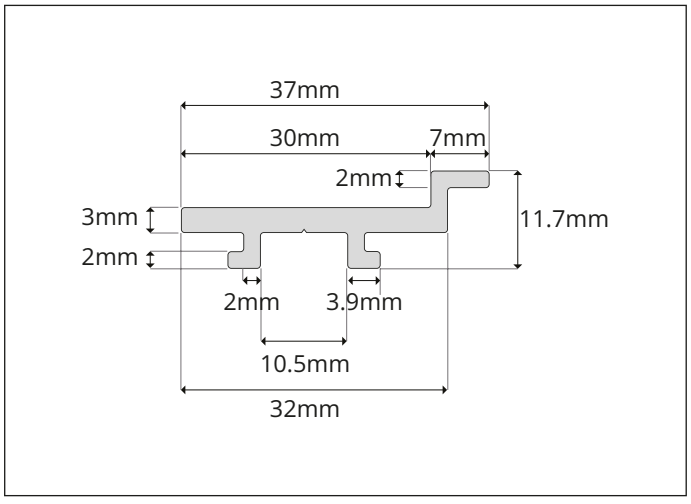

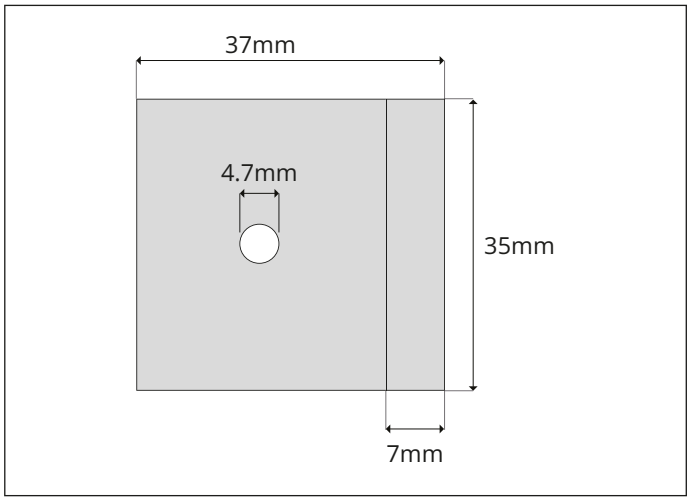

This handy aluminium fixing bracket enables our Long Arm Exhibition lights to be clipped onto the top of a slotted exhibition stand system. Simply slide the bracket onto the long arm fixing base and then hook into the top slot of your slotted exhibition stand system.

The weight of the long arm light holds the clip into place and prevents side to side movement so the it will stay fixed into position.
As the clip is simply slotted into place, installing and removing is quick and easy, simply tilt the long arm light to the back of the stand and lift off.

There is also a fixing hole located beneath the long arm slot if a more permanent solution is required or if it is to be fixed onto a wooden exhibition flat.
The long arm fixing clips will also store away with your other fixings into our Long Arm Carry Case (100.633) available separately.
