Hippo Strip to Wire IP20 4pins 10mm RGB (Pack of 10)

Product Codes:	100.816
Product Type:	Connector
Guarantee Period:	1 year
Connection Type:	Strip to Wire
Pin Quantity:	4 Pins
Strip Light Width:	10mm
Supported Light Colour:	RGB Strip
Maximum Current Load:	5A
Workable Wire Gauge:	22-20 AWG / 0.34-0.54 mm^2
Environment:	IP20
Housing Colour:	Black and clear

These commercial-grade Hippo connectors offer a rapid, reliable solution for linking LED strips together or wiring them to drivers. Engineered as a superior alternative to standard snap-on clips, they pierce the strip's circuit board to establish a firm, permanent connection. While ideal for speeding up installations, please note they are incompatible with high-density strips exceeding 60 LEDs per metre.

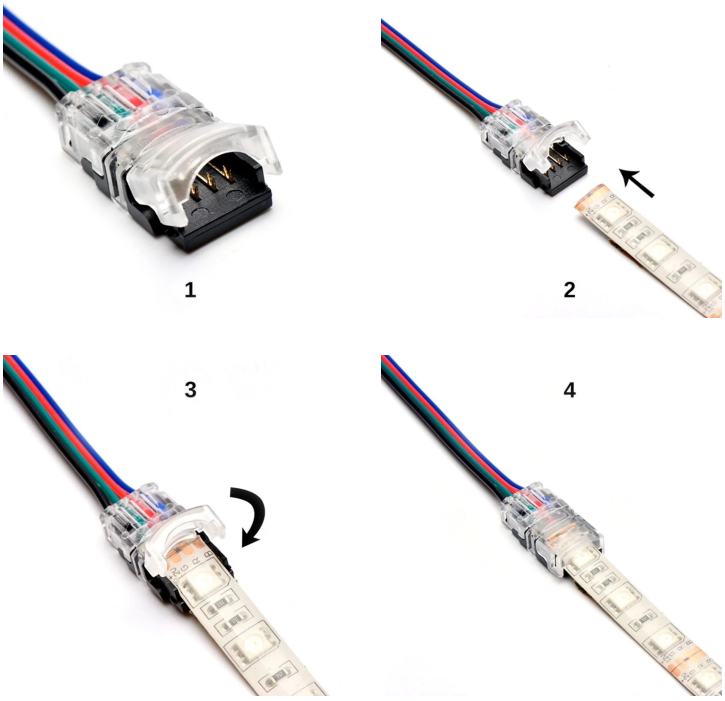

How To Use

Step 1
Open: Ensure the transparent locking cover on the connector is fully open.

Step 2
Insert: Slide the LED strip completely into the connector slot, aligning the copper pads directly underneath the metal connection pins.

Step 3
Press & Squeeze: Push the transparent cover downwards. You must use a pair of pliers to firmly SQUEEZE the connector shut. They require substantial force to pierce the contacts and will not simply click closed by hand.

Step 4
Lock: Verify the cover is completely snapped flush to secure the connection.
