## Flexi LED Rope Accessories List of Accessories available

- **101.983** Starter Set
- **101.984** End Caps (10 pcs)
- **101.985** 2-Pin Connectors (10 pcs)
- **101.986** Heat Shrinks (10 pcs)
- **101.987** Silicone Glue
- **101.988** 1 MTR Profile Pack (5pcs)
- **101.989** Plastic Clip Set (10 pcs)
- **101.990** 2-Pin Starter Connectors (10pcs)

Our Flexi Rope Starter Set is a **required** addition to power your LED Rope.

### 101.983 Set Includes:

- ✔ Connection Wire
- ✔ 2-Pin Connector
- ✔ End Cap
- ✔ Heat Shrink Sleeves

PROFESSIONAL USE ONLY

# Connecting the Starter Kit

**Before you start**, ensure you have the following tools and materials ready:

## Tools Required:

<p>x1</p>  <p><i>NOT INCLUDED</i></p> <p>New/Sharp Stanley Knife</p>	<p>x1</p>  <p><i>NOT INCLUDED</i></p> <p>Strong Pliers</p>	<p>x1</p>  <p><i>NOT INCLUDED</i></p> <p>Heat Gun</p>
<p>x1</p>  <p>50m Roll of LED Rope</p> <p>See Website for Full Product List</p>	<p>x1</p>  <p><i>NOT INCLUDED</i></p> <p>LED Rope Starter Kit</p> <p>Product Code: 101.983</p>	<p>x1</p>  <p><i>NOT INCLUDED</i></p> <p>Tube of LED Technologies Silicone Glue</p> <p>Product Code: 101.987</p>

- 1 x New/Sharp Stanley Knife
- 1 x Heat Gun
- 1 x Pliers
- 1 x Tube of LED Technologies Silicone Glue

- 1 x 50m Roll of LED Rope
- 1 x LED Rope Starter Kit

## Connecting the Starter Kit to your LED Rope

### 1. Determine Your Starting Point

- Unroll the 50m LED Rope and select the point where you want to begin your installation. (Either end of the LED Rope)

### 2. Connect the Starter Connection Pin

- Align the starter connector with the two copper wires on the LED Rope
- Secure the connection by pressing the pin in to the rope with pliers

### 3. Heat Shrink Sleeve Preparation

- Slide the heat shrink sleeve over the LED Rope, ready to cover the starter connection once the power source has been connected.

### 4. Plug in the Power Source

- Plug the 2-Pin Connector attached to the LED Rope into the Starter Cable of the starter kit

### 5. Test the Connection

- Test the connection by turning on the power to the LED Rope
- If the LED Rope doesn't light up, reverse the polarity of the connection
- If it still remains unlit, repeat Step 2 and re-test

### 6. Seal with Silicone Glue

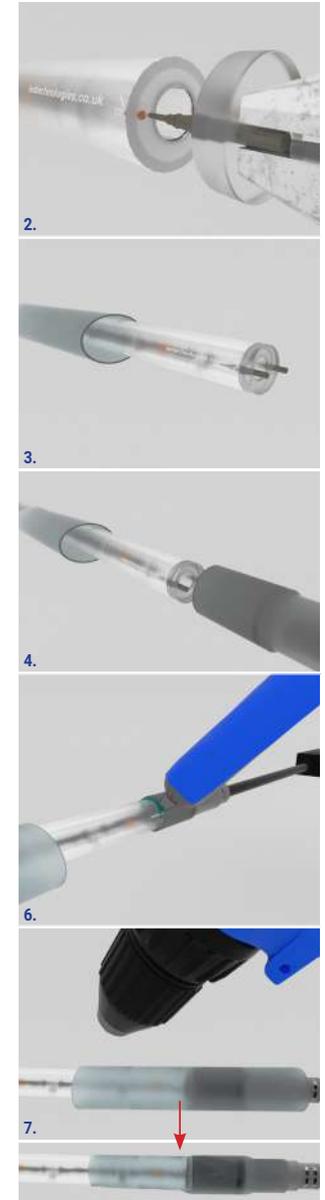

- After successful testing, apply LED Technologies Silicone Glue around the connection
- Allow the silicone glue to dry for at least 20 minutes

### 7. Waterproofing - Heat Shrink Sleeve

- Slide the Heat Shrink Sleeve from Step 3 over the starter joint
- Use the heat gun to shrink-wrap the sleeve, ensuring a waterproof seal

### 8. Securing the opposite end of the LED Rope

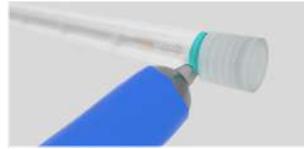

- To finish the setup of your LED Rope, you will need the included end cap to secure the opposite end of your rope

## Connecting the Starter Kit to your LED Rope (Continued)

### 9. Seal the End Cap

- Fill the end cap with LED Technologies Silicone Glue and then slide the other Heat Shrink Sleeve from your Starter Kit over the end of the rope

### 10. Secure the LED Rope

- Insert the opposite end of the LED Rope into the glue-filled end cap
- Apply further Silicone Glue to the connection, allowing it to dry for at least 20 minutes

### 11. Final Waterproofing

- Slide the Shrink Wrap over the LED Rope and end cap, leaving a small overhang to cover the entire end cap
- Allow it to dry using the heat gun to complete your LED Rope Installation

**By following these steps, you can successfully install your LED rope for a well-lit and durable solution. Enjoy your LED lighting!**

# Extending/Replacing a Length of LED Rope

**Before you start**, ensure you have the following tools and materials ready:

## Tools Required:

<b>x1</b>  <i>NOT INCLUDED</i> New/Sharp Stanley Knife	<b>x1</b>  <i>NOT INCLUDED</i> Strong Pliers	<b>x1</b>  <i>NOT INCLUDED</i> Heat Gun	<b>x1</b>  <i>NOT INCLUDED</i> Tube of LED Technologies Silicone Glue Product Code: 101.987
<b>x2</b>  50m Roll of LED Rope See Website for Full Product List	<b>x1</b>  <i>NOT INCLUDED</i> LED Rope End Cap Pack Product Code: 101.984	<b>x1</b>  <i>NOT INCLUDED</i> LED Rope 2-Pin Connector Pack Product Code: 101.985	<b>x1</b>  <i>NOT INCLUDED</i> LED Rope Heat Shrink Sleeve Pack Product Code: 101.986

- **1 x** New/Sharp Stanley Knife
- **1 x** Heat Gun
- **1 x** Pliers
- **1 x** Tube of LED Technologies Silicone Glue
- **2 x** 50m Roll of LED Rope

- **1 x** LED Rope End Cap Pack
- **1 x** 2-Pin Connector Pack
- **1 x** Heat Shrink Pack

## Extending / Replacing a Length of LED Rope (Max Length 100m)

### 1. Choose Your Connection Point

- Decide where you want to connect your LED Rope, keeping in mind the 100-metre limit on a single power supply

### 2. Make a Clean Cut

- Cut the LED Rope at a marked termination point (Scissors logo every 1 meter)
- Use a sharp blade for a clean cut, avoiding scissors to prevent damage to the connection

### 3. Prepare the Heat Shrink Sleeve

- Slide the heat shrink sleeve over the cut end of the LED Rope, preparing it for later use

### 4. Align the LEDs

- Take both separate LED Rope pieces and ensure the LEDs face the same direction for a proper connection

### 5. Secure the Connection

- Line up the LED Rope connector with the two copper wires on the LED Rope
- Use pliers to firmly secure the connection by pressing it in place

### 6. Connect the LED Rope

- When you are satisfied with the connection, push the piece of LED Rope you want to connect firmly onto the opposite side of the connector, directly into the copper wires

### 7. Test the Connection

- Turn on the starting LED Rope
- If the newly connected piece lights up your connection is correct
- If it doesn't light up, check if you have connected the copper wires correctly (if not, remove the connector and repeat steps 5 and 6) or ensure the LEDs are facing the same direction (repeat step 4)

## Extending / Replacing a Length of LED Rope (Continued)

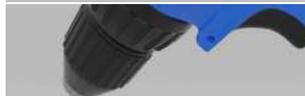

### 8. Seal and Waterproof

- Once you're happy with the tested connection, generously apply LED Technologies Silicone glue around the joint, covering all gaps, to create an airtight seal
- Allow the silicone to dry for at least 20 minutes

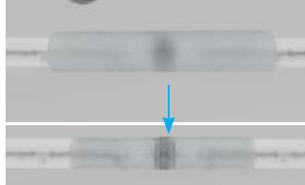

### 9. Apply Heat Shrink Sleeve

- Slide the heat shrink sleeve over the entire connection, covering both sides of the LED Rope and connector
- Use a heat gun to shrink-wrap the sleeve, ensuring a waterproof seal
- Allow it to dry for an additional 20 minutes

### 10. Secure the Opposite End of the Rope

- To finish the setup of your LED Rope, you will need an end cap from the pack of 10pcs to secure the opposite end of your rope

### 11. Seal the End Cap

- Fill the end cap with LED Technologies Silicone Glue and then slide the other Heat Shrink Sleeve from your Starter Kit over the end of the rope

### 12. Secure the LED Rope

- Insert the opposite end of the LED Rope into the glue-filled end cap
- Apply further Silicone Glue to the connection, allowing it to dry for at least 20 minutes

### 13. Final Waterproofing

- Slide the Shrink Wrap over the LED Rope and end cap, leaving a small overhang to cover the entire end cap
- Allow it to dry using the heat gun to complete your LED Rope Installation

## Simple Installation

The 101.983 Flexi Rope starter kit must be used with our 50m rolls of LED Flexi Rope in order to connect the Flexi Rope to the mains power supply.

- **Starter Cable:** Provides power to the Flexi Rope
- **2-Pin Starter Connector:** Links the Flexi Rope and Starter Cable
- **End Cap:** Provides a waterproof seal to the end of your Flexi Rope
- **Heat Shrink Sleeves:** Provides tight seals over joints and connections.

Product Code: 101.983

## 2-Pin Connector (Pack of 10 pcs)

The Flexi Rope Link connectors are supplied in packs of 10 x connectors that are fitted with pointed pins on both sides for the connector, unlike the starter pin connectors which have rounded pins on one side and pointed pins on the other side, the link connectors are designed to link multiple lengths of Flexi Rope together.

Note: The maximum length of the connected Flexi Rope is 100m.

Product Code: 101.985

## 2-Pin Starter Connector (Pack of 10 pcs)

The starter pin connector is supplied in our Flexi Rope Starter Kit (101.983) and are also available in a pack of 10 (101.990).

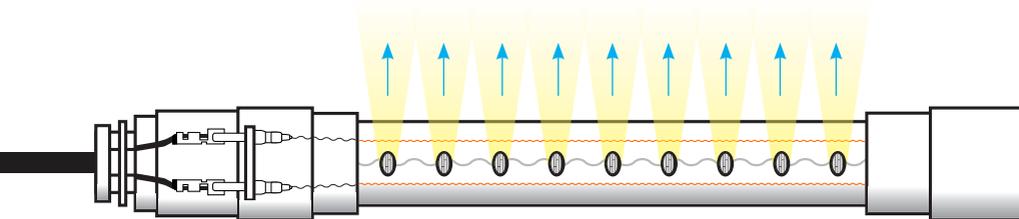

This 2-Pin Starter Connector links the end of the Flexi Rope and the power source of our Flexi LED Starter Kit together.

Product Code: 101.990

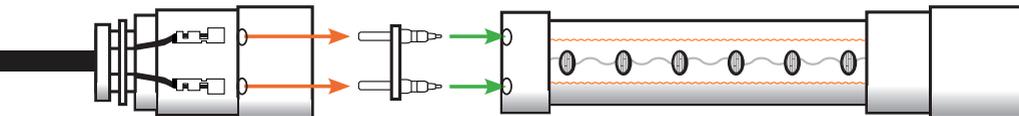

## Flexi LED Rope Diagram Light Direction

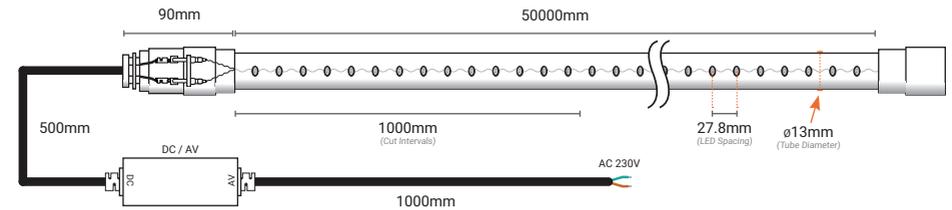

The diagram above shows the arrangement of LEDs within the Flexi Rope. They are all facing the same way. This design not only ensures a consistent and uniform glow but also opens up new possibilities for uplighting. The LEDs enable the rope to deliver an increased level of brightness with all the light directed in the same direction.

## Connection Diagram

1. Starter pin must be connected to the start of the LED Rope.
2. Firmly insert in to the two holes to connect to the wires inside the LED Rope.
3. Slide your Solder Heat Shrink Sleeve over the end of the LED Rope.
4. Push the connector on to the end of the LED Rope, ensuring the connector pins go through the holes.

## Product Dimensions

## Product Warranty

Flexi LED Rope is a decorative product for Professional installation and set up only. Installation must be adhered to. We provide a manual and video instruction. This must be followed correctly to ensure a long life.

### Your warranty is void if we deem the following:

Water ingress due to incorrect assembly – water ingress can happen slowly and failure may take some time, you are not covered under warranty if there is any evidence of water ingress.

LED Failure. If any LEDs have failed then we reserve the right to replace 1mtr lengths and will provide the joining connectors – we will not replace the whole roll. Normally a small number of LEDs will fail in the 1st year, and this is not a product fault and will be considered acceptable.

**+/-10% Tolerance on all specifications.**

**We reserve the right to change specifications without notice. E&OE  
This manual is by no means exhaustive.**

Please contact us for specific requirements/applications before purchase.
